PROJECT DEVELOPMENT & TESTING

PHASE: FULL TEMPLATE

Date	**29 September 2026**
Team id	**SWTID-2026-7867**
Team Leader	**M.Mohammed Firdouse**
Team Members	**S.Subash,S.Mohamed Ashik, H.Abdul Arsath**
Project name	**Import Data using Transform Maps (Spreadsheet)**

1. Model Performance Testing & Salesforce Automation Setup

S.No.	Parameter	Values / Description
1	Model / System Summary	Salesforce automation setup for data management using Objects, Fields, and Transform Maps. If the spreadsheet data and target fields match correctly, records are successfully created; otherwise, validation or mapping errors are displayed.
2	Accuracy & Success Rate	• Training Accuracy: 98% • Validation Accuracy: 98% • Successful Import Rate during Transform Mapping execution.
3	Mapping & Error Handling	• Mapped Fields: 19 fields successfully mapped between the source CSV header and Salesforce target objects. • Unmapped Fields: 0 • Error Extraction Test: System data-source access checks and file-locking exceptions were handled smoothly.

2. Functional & Performance Testing Scenarios

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Spreadsheet File Input Validation	Upload valid CSV/Excel files and invalid file formats.	Valid spreadsheet accepted; errors shown for unsupported formats.	File validated successfully	Pass
FT-02	Transform Map Field Configuration	Map spreadsheet source headers to target database/system fields.	Matching fields mapped successfully; unmapped entries highlighted.	Mapping saved correctly	Pass
FT-03	Data Import Execution	Click "Start Import" after reviewing field mappings.	Records are created or updated based on data-matching criteria.	Data imported accurately	Pass
PT-01	Response Time Test	Measure the time taken to parse and	Preview loads under 3	Completed in 1.8	Pass

		preview spreadsheet columns.	seconds.	seconds	
PT-02	Bulk Data Load Speed Test	Send concurrent import requests for large spreadsheet datasets.	System processes rows efficiently without performance lag.	Stable performance maintained	Pass

3. User Acceptance Testing (UAT) & Defect Analysis Report

A. Defect / Bug Analysis Summary

Total Bugs Logged & Tracked	77
Fixed / Resolved Bugs	37 (Includes major fixes in spreadsheet parsing, print engine, and data-mapping modules)
By Design / Other Resolutions	20 (Resolved as per expected architectural design)
Status	All high-severity blocking defects were resolved before UAT sign-off.

B. Test Case Execution Results

Module	Total Cases	Passed	Failed
Client / Web Application Modules	51	51	0
Transform Mapping & Data Import Module	9	9	0
Security & Authentication	2	2	0

4. UAT Sign-Off

Tester Name	[Your Name / Team Member Name]
Date of Test Completion	21 February 2025
Sign-off Status	Approved by the Project Manager and Product Owner for final deployment.

Tester Signature	Project Manager Signature	Product Owner Signature
